Products and Services

Find solutions, services, and products to maximize your buildings' performance

Air Quality

Titanium Systems' Room Shocker delivers a four-hour dose of chlorine-dioxide vapor to kill all bacteria, mold, mildew, and fungus in any room (up to 500 square feet). Room Shocker consists of a small packet of dry ingredients and a disposable plastic cup, has proven germ-killing effects, and oxidizes all organic odor molecules in the room.

Building Controls

Honeywell's Reveal features a touchscreen display to make monitoring and controlling facilities easier and more efficient, and interfaces seamlessly with WEBs-AX™ products. The unit is 6 inches by 3.5 inches, and features a high-def, full-color display and a grayscale display, and up to three data points for continuous display, giving you the ability to monitor live data like temperature and humidity levels.

Carpet

The Perceptions collection from Brintons is divided into eight concepts that explore the possibilities of scale and color, and uses texture to stimulate the look and feel underfoot. There are between six and 10 [designs](#) in each concept, and the collection ensures a strong design solution for most interior requirements.

Chillers

The Envision™ NXW Series of reversible chillers from WaterFurnace are now available in 8- to 20-ton sizes. The chillers feature quiet dual-scroll compressors with phase-guard protection to prevent reverse rotation of the compressors. The compact footprint of the NXW Series makes it easy to fit through [doors](#), and all unit frames are made of heavy-gauge steel.

Printed Wood Veneer Wallcoverings from Trove are made using regional and rapidly renewable materials from managed forests. Several varieties of high-quality, FSC-certified wood are used to produce the wallcoverings, including maple, oak, cherry, walnut, birch, and bamboo. The wallcoverings contribute to LEED certification, are similar in thickness to conventional wallcoverings, and are Class-A fire rated.
