Project Owner:
Cousins Properties Inc.

Contractors:
DPR Construction, Querrey Construction

Products:
Rapid Set® CR Concrete Resurfacer

The Colorado Tower high-rise project in Austin, Texas, included an 8,100-square-foot, multi-level parking structure. One level needed to be resurfaced, and project specifications called for a high-bond material.

The contractor used CR, which was applied by hand. The material was mixed via mechanical mixer and once applied, was broom finished to provide traction and slip resistance.
