

PROJECT BRIEF

WALEA BEACH RESORT - MARRIOTT MAUI

Project Type:

Hospitality

Application:

Exterior stucco repair

Location:

Wailea, HI

Project Dates:

April 19 – June 30, 2017

Project Owner:

Marriott

Contractor:

Jade Painting; Bronson

Product:

Rapid Set® Mortar Mix Plus

In 2016, Marriott introduced its completely revamped Wailea Beach Resort located on the island of Maui. To achieve its updated, contemporary look, the resort's architecture relies on clean, simple lines. Expanses of white walls—inside and out—create an elegant counterpart to surrounding white sand beaches.

In 2017, the hotel underwent repairs on portions of its stucco exteriors. 200 bags of Rapid Set Mortar Mix Plus (a blend of Rapid Set hydraulic cement, advanced additives, and quality aggregates) was supplied by White Cap and used for the repairs. Drill mounted mixers and paddles were used for mixing; finishing was accomplished with steel trowels. The surface was water cured.

Mortar Mix Plus is polymer-modified for better workability and stronger adhesion; it can be applied in horizontal, vertical and overhead applications. Mortar Mix Plus is also durable in marine environments.
